

## Android ListView 待办事项实验报告

### 一、实验目的

1. 掌握 ListView 控件的基本使用
2. 自定义适配器实现及数据绑定方法

### 二、实验内容与核心代码实现

1. 数据模型类 TaskItem

成员变量定义

```
public class TaskItem implements Serializable {  
    4 usages  
    private String taskName;  
    4 usages  
    private String dueDate;  
    3 usages  
    private boolean isCompleted;  
    5 usages  
    private boolean isFavorite;  
    2 usages  
    private long id;  
    1 usage  
    private static long idCounter = 0;  
}
```

构造函数实现

```
public TaskItem(String taskName, String dueDate) {  
    this.id = idCounter++;  
    this.taskName = taskName;  
    this.dueDate = dueDate;  
    this.isCompleted = false;  
    this.isFavorite = false;  
}
```

Getter/Setter 方法

```
public String getTaskName() {  
    return taskName;  
}  
  
no usages  
public void setTaskName(String taskName) {  
    this.taskName = taskName;  
}  
  
1 usage  
public String getDueDate() {  
    return dueDate;  
}  
  
no usages  
public void setDueDate(String dueDate) {  
    this.dueDate = dueDate;  
}  
  
no usages  
public boolean isCompleted() {  
    return isCompleted;  
}
```

## 2. 主活动 MainActivity

ListView 初始化

```
etSearch = findViewById(R.id.etSearch);  
btnAdd = findViewById(R.id.btnAdd);  
listView = findViewById(R.id.listView);  
  
adapter = new TaskAdapter(context, this);  
listView.setAdapter(adapter);
```

## 适配器设置

```
adapter = new TaskAdapter( context: this);  
listView.setAdapter(adapter);
```

## 示例数据填充

```
Usage  
public TaskAdapter(Context context) {  
    this.context = context;  
    this.taskList = new ArrayList<>();  
    this.filteredList = new ArrayList<>();  
  
    taskList.add(new TaskItem( taskName: "Complete Android Homework", dueDate: "2025-12-20"));  
    taskList.add(new TaskItem( taskName: "Buy groceries", dueDate: "2024-05-01"));  
    taskList.add(new TaskItem( taskName: "Walk the dog", dueDate: "2024-04-20"));  
    taskList.add(new TaskItem( taskName: "Call John", dueDate: "2024-04-23"));  
    filteredList.addAll(taskList);  
}
```

## 3. 自定义适配器 TaskAdapter

### getView 方法重写、视图复用机制

```
@Override  
public View getView(int position, View convertView, ViewGroup parent) {  
    ViewHolder holder;  
  
    if (convertView == null) {  
        convertView = LayoutInflater.from(context).inflate(R.layout.itemtask, parent, attachToRoot: false);  
        holder = new ViewHolder();  
        holder.ivFavorite = convertView.findViewById(R.id.ivFavorite);  
        holder.tvTaskName = convertView.findViewById(R.id.tvTaskName);  
        holder.tvDueDate = convertView.findViewById(R.id.tvDueDate);  
        holder.cbCompleted = convertView.findViewById(R.id.cbCompleted);  
        convertView.setTag(holder);  
    } else {  
        holder = (ViewHolder) convertView.getTag();  
    }  
  
    TaskItem task = filteredList.get(position);
```

### 数据绑定逻辑

```

TaskItem task = filteredList.get(position);

holder.tvTaskName.setText(task.getTaskName());
holder.tvDueDate.setText(task.getDueDate());

if (task.isCompleted()) {
    holder.tvTaskName.setPaintFlags(holder.tvTaskName.getPaintFlags() | android.graphics.Paint.STRIKE_THRU_TEXT_FLAG);
    holder.tvTaskName.setTextColor(context.getResources().getColor(android.R.color.darker_gray));
} else {
    holder.tvTaskName.setPaintFlags(holder.tvTaskName.getPaintFlags() & (~android.graphics.Paint.STRIKE_THRU_TEXT_FLAG));
    holder.tvTaskName.setTextColor(context.getResources().getColor(android.R.color.black));
}

updateFavoriteIcon(holder.ivFavorite, task.isFavorite());

holder.cbCompleted.setChecked(task.isCompleted());

holder.ivFavorite.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
        task.toggleFavorite();
        updateFavoriteIcon(holder.ivFavorite, task.isFavorite());
        updateOriginalItem(task);
        notifyDataSetChanged();
    }
});

```

#### 4. 布局文件设计

activity\_main.xml 布局结构

```

<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    android:background="@android:color/white">

    <LinearLayout
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:orientation="horizontal"
        android:padding="16dp"
        android:background="@android:color/white"
        android:elevation="4dp">

        <EditText
            android:id="@+id/etSearch"
            android:layout_width="0dp"
            android:layout_height="48dp"
            android:layout_weight="1"
            android:hint="请输入关键词"
            android:paddingStart="16dp"
            android:paddingEnd="16dp"
            android:background="@drawable/edittext_background"
            android:inputType="text"
            android:maxLines="1"
            android:imeOptions="actionDone" />
    </LinearLayout>
</LinearLayout>

```

```
<Button
    android:id="@+id/btnAdd"
    android:layout_width="48dp"
    android:layout_height="48dp"
    android:layout_marginStart="12dp"
    android:background="@drawable/button_background"
    android:text="+"
    android:textSize="24sp"
    android:textColor="@android:color/white" />
</LinearLayout>

<View
    android:layout_width="match_parent"
    android:layout_height="1dp"
    android:background="#EEEEEE" />

<ListView
    android:id="@+id/listView"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:divider="#EEEEEE"
    android:dividerHeight="1dp"
    android:padding="0dp" />
</LinearLayout>
```

itemtask.xml 自定义列表项布局

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:orientation="horizontal"
    android:padding="16dp"
    android:background="?android:attr/selectableItemBackground">

    <ImageView
        android:id="@+id/ivFavorite"
        android:layout_width="24dp"
        android:layout_height="24dp"
        android:layout_marginEnd="12dp"
        android:src="@drawable/ic_star_border"
        android:contentDescription="收藏按钮" />

    <LinearLayout
        android:layout_width="0dp"
        android:layout_height="wrap_content"
        android:layout_weight="1"
        android:orientation="vertical">

        <TextView
            android:id="@+id/tvTaskName"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:textSize="18sp"
            android:textColor="@android:color/black" />

        <TextView
            android:id="@+id/tvDueDate"
            android:layout_width="match_parent"
```

```
<TextView
    android:id="@+id/tvDueDate"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:textSize="14sp"
    android:textColor="@android:color/darker_gray"
    android:layout_marginTop="4dp" />
</LinearLayout>

<CheckBox
    android:id="@+id/cbCompleted"
    android:layout_width="24dp"
    android:layout_height="24dp"
    android:layout_marginStart="12dp" />
</LinearLayout>
```

#### 四、实验结果展示

1.列表项正确显示任务名称和截止日期可添加收藏或取消收藏

2.添加任务功能正常

添加新任务

任务名称

android task

截止日期

2025-12-20

取消 添加

2025  
Thu, Dec 18

< December 2025 >

S	M	T	W	T	F	S
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

CANCEL OK

请输入关键词

+

---

☆ android task

2025-12-20

☐

3.完成任务划掉正常

请输入关键词

+

---

☆ android task

2025-12-20
